| •AttendIQ – Smart Attendance System <a href="#">Live Demo</a> <a href="#">Source Code</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Mar-2026 |
| Web-based attendance management system with analytics and responsive UI                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |          |
| <ul style="list-style-type: none"><li>– Tools &amp; Technologies: HTML, CSS, JavaScript, GitHub Pages</li><li>– Developed a smart attendance management system used by 20+ students, featuring attendance tracking, analytics dashboards, and a responsive user interface.</li></ul>                                                                                                                                                                                                                                                                                                                          |          |

TECHNICAL SKILLS AND INTERESTS

**Languages:** Java, JavaScript, Python  
**Frontend:**React.js, HTML5, CSS, Tailwind CSS, Vite  
**Backend & Databases:** Firebase Firestore, Firebase Authentication,MongoDB  
**Developer Tools:** Git, GitHub, VS Code, Firebase Hosting , AI APIs  
**Core Subjects:** Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Network, Web Application  
**Areas of Interest:** Full Stack Development, Software Engineering, AI-Powered Applications, Problem Solving  
**Soft Skills:** Strong problem-solving, self-learning, project-based development, real-world application building
